**This Discovery Book belongs to:**

## Wonders of the Ocean

The ocean is a home for many animals. Those animals have special bodies that let them live underwater. These special body parts are **adaptations**. An adaptation helps an animal live in its home.

What would you need to live in the ocean?

**Read the adaptation on one side. Next, draw a line to the tool that you would need to do the same thing.**

### Tools

Wet Suit

Snorkel

Flippers

Goggles

### Adaptation

**A clear eyelid. It can close under water, but still lets the animal see.**

**The nose is near the top of the head. This makes it easier for the animal to breathe.**

**A special kind of fat called blubber. Blubber keeps the animal warm.**

**Flippers let the animal swim faster.**

## Working Wetlands

Many animals like to live in wetlands. Wetlands have shallow water with a lot of small plants. Animals can get shelter and food from these plants. Wetlands can also act like sponges, soaking up a lot of water. Without wetlands, more floods could happen. Wetlands are habitats with important jobs!

**Read each job below. If you think a wetland does that job, circle it. If you think a wetland does not do that job, put an X over it.**

### A wetland....

Is good at growing very tall trees.

Is a place where animals can find food.

Is a good home for desert animals.

Is a home for animals who like water.

Is a nursey where baby fish can grow up.

Soaks up extra water and helps stop floods.

## Savanna Seasons

The African Savanna is a big grassland. It is a home for many animals. Few trees grow on the savanna. The savanna has a wet, rainy season and a dry, hot season. When it rains, the grass is green. When it is dry, the grass is brown.

**Draw your own picture of the savanna below.**

In your savanna, is it the dry season or the wet season?

---

What animals live in your savanna?

---

---

## My Rainforest Log

**Read each sentence carefully. Choose the Missing word for each sentence.**

**Write the missing word in the blank.**

### Word Bank

Plants	Layers	80	Animals	Air
--------	--------	----	---------	-----

A rainforest gets at least \_\_\_\_\_ inches of rain every year.

Rainforests have four \_\_\_\_\_.

Plants in the rainforest make the \_\_\_\_\_ we breathe.

Many different \_\_\_\_\_ and \_\_\_\_\_ live in the rainforest.

**Fill in the answers below.**

Can you name an animal who lives in the rainforest?

---

Can you name an animal who would NEVER live in the rainforest?

---
