Habitat Thaumatrope

A thaumatrope is a visual trick that makes your eye merge two images. In our habitat and animal versions you get to color and play with three different versions.

Supplies

- Color page
- Wooden skewer or thin stick
- Scissors
- Glue or tape
- Crayons

Steps

1. Color your animals and their habitats
2. Cut along the dotted lines
3. Fold in half and glue to end of wood skewer
4. Spin the skewer in your palms to see your animal in their habitat!
