Learning with Fresno Chaffee Zoo

Snail Painting

Supplies
• Paper (thicker paper like cardstock or poster board work best)
• 1 Table spoon of water mixed with 5 drops of food coloring with as many different colors as you wish
• Snails from your yard

Steps
1. Mix food coloring and water in different containers.
2. Dip the snails “foot” into the colored water.
3. Place snail on the paper
4. Enjoy watching the snails paint a picture.
   If snails run out of color or reach the edge of the paper pick them up and dip them back into the colored water and return to the paper.
