

Savannah Scout Field Journal

Savannah Scout Pledge

To all wildlife, I will be true.
From forests green to oceans blue.
Each creature is special in their own way.
And with my help, will be here to stay.

Recycling and reusing are a great start.
With the Earth's resources, I will be smart.
As a Scout, I will do my share.
To show our world how much I care.

Scout's Name

Jambo!

Welcome to Africa! Your African Adventure starts here, in the Ajabu Reserve. The Ajabu Reserve is home to a large variety of animals that all share the savannah and its resources. Our team of rangers, wildlife biologists and educators work together to ensure the well-being of our Reserve's inhabitants through research, education and conservation.

You are now a part of our team. As a Scout, you will contribute to our mission by studying the wildlife, collecting data and inspiring others to join in. We must all work together to ensure a bright and healthy future for all those who call the Ajabu Reserve home.

Thanks and welcome aboard!

-Ajabu Rangers

Challenge

Giraffe Patterns

There are different types of giraffes that live in Africa. One of the ways animal experts can tell them apart is by looking at their coat patterns. Take a look at the following coat patterns and compare them to the giraffes you see on our savannah.

Which type of giraffe live in the Ajabu Reserve?

Masai

Rothschild's

West African

South African

Reticulated

The Ajabu Reserve is home to
_____ giraffes!

Challenge

Ranger Talks

Scientists work together and share research to learn everything they can about wildlife and conservation.

Consult the animal experts that work in the Ajabu Reserve by attending two African Adventure Ranger Talks. Be sure to ask questions and record at least one new fact you learn at each of the talks. Don't forget to have the Ranger sign off on your research!

Challenge

The Amazing Ostrich

As the world's largest bird, there are many things about the ostrich that make it unique. There are also some common myths about ostriches that are not true. Be an animal detective and see if you can separate ostrich fact from ostrich myth.

Circle True or False for the statements below.

Ostriches cannot fly.

True False

When threatened, an ostrich will bury its head in the sand.

True False

Ostriches can run over 40 mph.

True False

The eye of an ostrich is bigger than its brain.

True False

Ostriches cannot drink water.

True False

**Thank you for participating
in our virtual visit to
Fresno Chaffee Zoo!**

**On your next visit, get the full Savannah
Scout Guide to complete all of the activities.**
